

GENERUSS LLC / PREPARED FOR OREGON GHOST CONFERENCE

The 2027 System: what is built, what is left, and what it costs

A clear, itemized look at the work, priced piece by piece, with maintenance taken off the table.

Prepared for **Rocky Smith Jr** • June 2026 • Russ Gardner, Generuss

Rocky, this rebuilds the number from the ground up, itemized, so nothing is a black box. Read it at your pace. Each section has a checkbox if you are good with it, a second one if you would rather talk it through, and a notes field either way. Nothing here is locked, and there is no rush to agree to all of it at once.

The short version: most of what you were picturing as "still to come" is already live and in your hands. What remains is a smaller, clearly priced list. And the monthly maintenance fee that gave you pause is gone, replaced by something that costs you nothing out of pocket.

1. Where the system stands today

LIVE NOW In your hands today

All of this is built, deployed, and working right now:

- The full public website, custom built, mobile-ready, on your brand
- 80 plus vendor profile pages, cross-linked to the schedule
- The 3-day interactive schedule with a personal itinerary builder
- Online ticketing and checkout (cart, capacity limits, refunds, digital waivers, confirmation emails)
- The attendee portal with logins, QR passes, and receipts
- Mission Control, your dashboard to review and approve applications, see finances, and run the event
- The application system and the survey platform that feeds your planning
- The visual editor (CMS) so you can change site content yourself in about a minute

FINISHING NOW**Active work, small and clearly scoped**

A short list of items to carry the system through to your 2027 launch. A few of these finish or extend something already live (Mission Control runs today, for example, and this completes the last of its automation), and you pay for each only as it is delivered. Priced below.

OPTIONAL**Extras I can help with, only if you want them**

None of this is part of the 10k, and none of it is something you owe me for. These are just ideas I can build if you ever decide you want them: email nurturing and list health, a class and room coordination tool, and a dedicated conference chatbot. No pressure and no timeline. They are here only so you can see what is possible down the road.

2. What it costs, itemized

You pay for this system **one time**. Here is every piece, with what it would cost on the open market beside what you are actually paying. The market column shows the freelance to agency range. Your price sits below even the freelance end.

Already delivered

DELIVERED	MARKET (FREELANCE TO AGENCY)	YOUR PRICE
Custom website design and build The full public site, custom designed on your brand, mobile-ready, every page built from scratch.	\$4,000 to \$9,000	\$1,200
Mission Control dashboard Your private command center to review and approve applications, see finances, manage vendors, and run the event.	\$5,000 to \$11,000	\$1,000
Application system + survey platform The online application that branches by role (vendor, sponsor, speaker, instructor), plus the survey tool that gathers feedback to shape the event.	\$3,000 to \$7,000	\$850
Ticketing and checkout Direct ticket sales with cart, capacity limits, refunds, digital liability waivers, and branded confirmation emails.	\$3,500 to \$8,500	\$650

DELIVERED	MARKET (FREELANCE TO AGENCY)	YOUR PRICE
Attendee portal Where attendees log in to see their schedule, QR entry passes, and receipts.	\$2,500 to \$6,000	\$550
Vendor directory + 80 plus profile pages A dedicated page for every vendor, linked to the schedule, with a directory that ties it all together.	\$2,000 to \$5,000	\$450
Interactive schedule + itinerary builder Your three-day schedule with filters, and a tool that lets attendees build a personal plan for the weekend.	\$2,500 to \$5,500	\$400
Instructor roster + QR check-in Lets instructors see their class rosters and check attendees in by scanning their pass at the door.	\$2,200 to \$5,000	\$400
Interactive venue + hotel map A live map of all six venues and five partner hotels, with floor plans.	\$1,200 to \$3,000	\$250
Self-service content editor (CMS) The visual editor that lets you change site content yourself in about a minute, no code.	\$1,500 to \$3,500	\$250
Content migration and data entry Entering all of your conference content into the system: the 80 plus vendor profiles, 80 events across three days, your sponsors, partner hotels, and ticket and class pricing, pulled together from the old site, PDFs, and Facebook.	\$1,800 to \$4,500	included
Domain, email, hosting, SEO, accessibility setup Getting the site online and findable: domain, professional email delivery, fast hosting, search-engine setup, and accessibility.	\$1,000 to \$2,500	included
Delivered work	about \$30,000 to \$70,000	\$6k

The **\$6,000** covers everything in this first list, the work already built and in your hands. It is what gets us moving.

To finish, paid as each piece is delivered

TO FINISH	MARKET	YOUR PRICE
Complete Mission Control and the application-to-profile pipeline Finishing the dashboard and the automation that turns an approved application into a published vendor profile, so you are not doing it by hand each year.	\$3,000 to \$7,500	\$1,000
Your own Stripe account, set up with automatic payouts Standing up the conference's own Stripe account, connecting it so the ticket money and the automatic fee both route correctly, building the instructor and vendor payout logic, and wiring the webhooks and reconciliation. I drive the whole setup with you.	\$2,500 to \$6,500	\$1,000
Press kit system Building the branded, ready-to-use marketing templates every vendor can customize to promote the conference.	\$1,800 to \$4,500	\$600
Vendor self-service logins Each vendor logs in to see how many class tickets they have sold and who is signed up, without touching their profile, which stays accurate because it comes from their application.	\$2,500 to \$6,000	\$500
Build out the 2027 schedule Loading this year's full schedule of classes, speakers, and events into the system once it is set, wired to the filters and the vendor pages.	\$1,200 to \$3,000	\$500
Publish the 2027 vendor profiles Running each approved applicant through the pipeline and taking them live as profiles on the site, with images and details mapped correctly.	\$1,200 to \$3,000	\$400

TO FINISH	MARKET	YOUR PRICE
Domain switch and DNS Pointing oregonghostconference.com at the new site and handling the technical switchover. On the house.	\$400 to \$1,200	included
Ad placement system Setting up the on-site ad slots, including the footer credit and the homepage marquee, ready to use.	\$1,000 to \$3,500	included
About page for the site A dedicated About page for the conference, its story, mission, and history, so first-time visitors get the full picture.	\$600 to \$1,500	included

Remaining work

about ~~\$14,000 to \$37,000~~ \$4k

The **\$4,000** is paid in increments, as each paid item above is completed and delivered, never up front, and we set a target date for each together. The domain switch, the ad slots, and the About page are on the house.

For context, the full scope was originally quoted at \$15,000. I have taken **\$5,000 off the top**, so we are working with numbers that feel comfortable instead of stressful. Showing you the market rates above is not about justifying a big number. It is so you can see, piece by piece, everything you are not paying for.

A note on those market numbers: I had them audited a few times, because I wanted to be sure I was not inflating anything. It came back the other way, the work is worth more than I had figured. The ranges reflect 2026 US freelance and small-agency pricing for custom builds of this kind.

Included at no extra charge

- ✓ Opening your 2027 ticket sales
- ✓ Training for you and your team, as many sessions as you need, starting when you are back in town
- ✓ Team and committee account setup with role-based access
- ✓ On-call support through conference weekend, March 2027
- ✓ Hosting on Cloudflare's global network, no monthly hosting bill
- ✓ Security, SSL, uptime monitoring, and spam protection
- ✓ Bug fixes and patches, never a surprise invoice
- ✓ Your data is yours, full attendee and order export on request, anytime

- ✓ An always-on site that never goes dark in the off-season

3. Maintenance: no monthly invoice, funded a smarter way

The original plan had a \$500 monthly maintenance fee starting in July. From July through your March conference, that was **\$4,500** out of your pocket before the event even happened.

The monthly fee is gone. That is \$4,500 you are not paying this cycle, and no set monthly maintenance going forward.

On top of the \$5,000 I took off the upfront price, that brings your savings to **\$9,500** so far, and that is before counting the gap between full market rates and the Rocky rate I am giving you across everything above.

In its place, a small fee rides inside the ticket price. To be straight with you, it is not free, it is funded by ticket sales rather than billed to you, so you never get an invoice and it only moves when money is actually coming in. It only touches ticket sales, and it scales with how well the conference does, so we are on the same side: the more people we get through the door, the better it works for everyone.

Worth naming plainly: your vendors have absorbed booth price increases year after year. This is the first time the attendee ticket has been raised at all. The fee rides inside that ticket, so it is not a new cost anyone is handed, it is built into a price that was already moving.

4. The ticket price: \$25 or \$30

For comparison, the Port Gamble Ghost Conference charges attendees **\$45** for three days and vendors **\$100** per booth. Their model favors the house. Yours has always favored the attendee. If we are raising the attendee ticket now, there are two ways to do it.

Pick the one you are leaning toward, and we can talk it through:

☐ **OPTION A**

\$25 ticket

Your planned increase. With a fee that is lower than Peek's, more of each ticket stays with you than before. Less reaches you than the full \$25, but more than you netted under the old setup. Close to a wash, in your favor.

☐ **OPTION B, RECOMMENDED**

\$30 ticket

Still well under Port Gamble. Easy to justify at \$10 per person per day. You net more per ticket than the \$25 plan even after the fee, and the difference funds the system that is bringing those people in.

Here is exactly how a single ticket breaks down, so nothing is hidden. Stripe, the company that runs the card charge, takes 2.9% plus a flat 30 cents on every ticket (the 30 cents is fixed, no matter the price). On top of

that sits the small system fee that replaces your maintenance. I would put it around 6%, and here is what that looks like:

- **\$25 ticket:** Stripe takes about \$1.03, the 6% system fee is \$1.50, you net about **\$22.47**.
- **\$30 ticket:** Stripe takes about \$1.17, the 6% system fee is \$1.80, you net about **\$27.03**.

Either way you net more per ticket than you did under Peek, who charged 8% on top of the same card fees. The exact percentage is something we lock in together once we see your ticket numbers, and it stays below Peek's 8% no matter what. It is baked into the one ticket price, so no attendee ever sees a separate fee and you never send an invoice. That fee, plus the on-site ad space in the next sections, is what covers the year-round upkeep on my side, so everyone's margins stay fair.

A side note, not part of this agreement: when you have the bandwidth, I would love to kick around ideas for easing the cost pressure your vendors and instructors carry. Entirely your call, whenever.

5. How the fee reaches me, with zero work on your end

- **You get your own Stripe account, and I do the setup.** I drive the whole thing on a call with you. The only parts you touch are the few Stripe requires from the owner directly, your bank details and a quick identity check, and I am right there for those. The money, the customer relationships, and the control are all yours, in your name.
- **My small percentage comes off each ticket automatically, the moment it sells.** It is not an invoice you pay and not a year-end settlement. It is peeled off each sale in real time and routed to me. You will be able to watch ticket revenue climb live throughout the conference.
- **It only touches attendee ticket sales.** Nothing comes out of vendors, instructors, or events. Their money is theirs.
- **The account is yours, in your name, permanently.** You are never locked into me or any platform to keep it running. It is simply yours.

6. Press kits, and why they pay for themselves

The press kit system is exponential marketing power for the conference: it hands every one of your 80-plus vendors ready-made, on-brand materials they can customize and post in minutes, turning your entire vendor base into frictionless advertising that fills the room. Here is the value, shown piece by piece:

A basic marketing kit from a freelance designer runs **\$150 to \$200** per vendor.

You have roughly **80 to 100 vendors**.

At \$150 to \$200 each, that is **\$12,000 to \$20,000** of design work, every single year, handed to your vendors for free.

We can set the system to reuse the same templates every year, or rotate in fresh flyer options as we go. Holly is meeting with the vendors in person the first year, and the reusable training videos she creates would keep

delivering value for years after, which is a big part of what makes the arrangement in the next section a fair trade.

The bigger point is what this does to attendance. When every contributor has a seamless way to market the conference, reach compounds. **If each vendor brings in just one additional attendee, that is around 80 extra tickets a year, and the press kit has paid for itself several times over.** That is the engine this is really building.

7. Holly Cole

No lifetime booths or speaker slots. Anything open-ended is a slippery slope for both of us, so this is defined and it has real value behind it.

Three to five years of a comped booth for Holly, in exchange for her running vendor marketing training once or twice a year and producing the press kit and marketing template library the conference keeps and reuses. That is the \$12,000 to \$20,000 of annual vendor design value from the last section. It is also worth naming that Holly has been the bridge on this entire build, the reason it moved as fast as it did, because you never had to sit and explain the conference to a developer. I feel that three to five booth fees waived is a fair way to meet in the middle, rather than waiving them forever.

8. Generuss as your website sponsor

You pointed out, fairly, that the ad space on the site has value. So we name it. Generuss becomes the conference's official Website and Technology Sponsor, shown on site as **Generuss Design** so it matches generussdesign.com. In practice it is a modest footprint: my placement on the vendor pages and a small credit in the site footer, the kind of thing already running now. A mention on the homepage marquee for the first year or two would be a nice addition while the system is new, and after that I am glad to hand that slot back for you to sell. The placements are valued at your own published rate of \$75 to \$125 each, and that space helps offset the upkeep on my side alongside the ticket fee. The exact logistics are wide open for us to talk through.

Two more pieces in this exchange: the right for me to feature the conference as a case study, which costs you nothing, and a speaker slot for Holly and me at the 2027 event to present the new system to your attendees. The specific ad placements and counts are worth a back-and-forth between us once you have had time to look at the rest.

9. Who owns what, and how either of us can step back

- **You own all of it.** The site and its code, your data with full exports on request, the domain, the hosting account, your Stripe account, and the admin logins, all in the conference's name. You are free to hand it to another developer at any time. By the end of training, you will also fully know how to run the whole system yourself, top to bottom.

- **I build and maintain. That is my lane.** Site health, uptime, security, patches, fixes, backups, and keeping every piece running so you never have to think about it.
- **The arrangement runs one year and renews automatically.** Either of us can step back on 60 days written notice, and your data exports to you on request, anytime. A relationship you both renew by choice, not one neither can leave.

10. Getting you comfortable running it

You should never feel like you are paying for something you cannot drive. We will schedule training sessions across the summer, as many as you need, starting once you are officially back in town. By the time tickets go on sale, you and your team will be running the dashboard, approving applications, and editing the site without me.

11. A few questions, so the math works for everyone

To set the ticket fee so it is fair to you, your vendors, and the event, it would help to know:

1. Roughly how many tickets are sold at the conference per year, for the last 3 years?
2. On average, how many vendors do you have per year?
3. Anything else about the conference's numbers you think we should factor in, so the fee is fair to everyone.

No exact figures needed, ballparks are fine, and we can cover the rest on a call.

12. Why this is the profitable move

You pay for this system once. After it is finished and you know how to run it, the only things you carry forward are:

- The transaction percentage, which is rolled into the ticket price and paid by attendees
- The ad space on the site that Generuss Design uses
- Any booth fees we negotiate

That is it. No monthly bill, no platform skimming every sale the way Peek did. Once this is in place, every Oregon Ghost Conference from here forward is far more profitable and a much smoother operation than it has ever been.

That is the whole picture. Check the boxes you are good with, leave notes anywhere you are not, and we will work through the rest together. When you are ready on the

delivered work, the \$6k gets us moving.
